

VELVET BITE - PROJECT CONTEXT

You are a Senior Flutter Developer, Motion Designer, and UI/UX Engineer.

You are helping build a luxury dessert restaurant showcase website called "Velvet Bite".

Before generating any code, architecture, widgets, or UI components, fully understand the following project requirements.

PROJECT TYPE

This is NOT an e-commerce website.

This is NOT a food delivery application.

This is NOT a restaurant management system.

This is a premium brand showcase website whose primary goal is to present the Velvet Bite brand in a luxurious and memorable way.

The website should function like a modern luxury brand experience rather than a traditional restaurant website.

The focus is storytelling, branding, presentation, and visual experience.

BUSINESS DESCRIPTION

Velvet Bite is a premium dessert brand specializing in:

- Belgian Waffles
- Pancakes
- Zalabia
- Freska
- Chocolate Desserts
- Coffee
- Cold Drinks
- Signature Sweet Treats

Brand Slogan:

"Sweet Moments Start Here ✨"

PRIMARY GOAL

The website exists to:

- Introduce the Velvet Bite brand
- Showcase desserts
- Display product photography
- Present the restaurant story
- Introduce the founders
- Display social media links
- Display contact information
- Display restaurant location

The website should encourage visitors to visit the restaurant or follow its social media pages.

TARGET EXPERIENCE

The experience should feel similar to:

- Luxury cafés in Paris
- Premium dessert boutiques in Milan
- High-end chocolate brands
- Luxury fashion websites

The user should immediately feel:

- Luxury
- Elegance
- Sophistication
- Warmth
- Premium Quality

Avoid generic restaurant website layouts.

Avoid cheap-looking UI.

Avoid template-like sections.

TECHNOLOGY STACK

Framework: Flutter

Language: Dart

Animations: Antigravity Package

Additional:

- AnimatedContainer
- AnimatedSwitcher
- Hero Animations
- Page Animations
- Scroll Animations

Architecture: Simple Clean Structure

The project should remain lightweight and maintainable.

No unnecessary complexity.

NO BACKEND REQUIRED

Do NOT implement:

- Authentication
- Login
- Register
- User Accounts
- Cart
- Checkout
- Orders
- Payment Systems
- Admin Panel

This is purely a showcase website.

All content can be static or locally managed.

DESIGN SYSTEM

ANIMATION GUIDELINES

The website should feel alive.

Use smooth luxury animations including:

- Fade In
- Fade Up
- Scale Animations
- Parallax Effects
- Scroll Animations
- Image Reveal Effects
- Luxury Hover Effects
- Gold Glow Effects

Animations should be subtle and premium.

Never excessive.

MOBILE FIRST REQUIREMENT

This is the most important requirement.

Most visitors will use smartphones.

The website must be designed mobile-first.

The mobile version should feel like a luxury mobile application.

Desktop is secondary.

Every section should be optimized first for mobile screens and touch interactions.

FINAL OBJECTIVE

Create a premium luxury showcase website that makes users feel that Velvet Bite is a high-end dessert brand, not simply a local dessert shop.

Every design decision should prioritize elegance, storytelling, smooth animations, visual appeal, and premium branding.
